Figure 1 shows a schematic diagram of a two-dimensional lattice. The lattice is represented by a grid of points. A central point is labeled '0'. Points are labeled with integers from -10 to 10. The horizontal axis is labeled 'x' and the vertical axis is labeled 'y'. The lattice is shown in a perspective view, with the axes extending into the distance.

Figure 1. Schematic diagram of the experimental setup. The subject is seated in a chair and views the target through a video screen. The target is a light source that is controlled by a computer. The subject's hand is positioned on a horizontal surface. The distance between the hand and the target is 10 cm. The target is a light source that is controlled by a computer. A small, dark, rectangular photograph showing a person standing in a field, possibly a soldier or a worker, with some text visible below the image.

A schematic diagram of a 2D hexagonal lattice. The lattice is composed of solid circles representing atoms. A central atom is labeled '1'. It is surrounded by six atoms in a hexagonal arrangement, labeled '2' through '7'. The atoms are connected by lines representing bonds. The diagram illustrates the geometry of the lattice and the specific atoms involved in the study.
